Executive Operations & Shop Floor Analytics Report | Generated: 7/9/2026, 10:51:18 AM

1. Operational Summary Indicators

TOTAL MATERIAL BASE 108 Profiles (86 Raw, 22 Finished)	RECIPE CONFIGURATION 22 Active BOM Recipes
SCM PROCUREMENT INVESTED \$0 spend across 0 POs	MANUFACTURING RUNS 0 Batches (0 Complete, 0 QC Checked)
QUALITY GATES COMPLIANCE 100.0% QC Pass Rate (0 Passed, 0 Failed)	WAREHOUSE STOCK VOLUME 175,300 Units (108 items in stock)

2. Executive Insights (Core ERP Analytics)

- 1

Warehouse Material Stock Coverage

Active balances are recorded for 108 out of 108 total master materials (100.0% warehouse coverage). Replenishing empty slots secures manufacturing continuity.
- 2

Bill of Materials Configuration Status

BOM recipes are configured for 22 out of 22 finished product profiles (100.0% configuration rate). Verify that all recipes match current engineering drawings.
- 3

Quality Assurance Compliance Rate

Quality control inspections have checked 0 manufacturing batches with a 100.0% pass rate (0 passed, 0 failed). A stable pass rate minimizes rework costs.
- 4

Procurement Investment Spend

Total procurement expenditure on received goods stands at \$0 across 0 finalized POs. Tracking spend aids in vendor price renegotiation.
- 5

Pending Approvals Procurement Exposure

There are 0 pending purchase orders awaiting manager authorization, representing a cash flow commitment of \$0.
- 6

Manufacturing Batch Operations Distribution

Out of 0 production orders created in this period, 0 are finished, and 0 are QC-gated and stocked in inventory.
